

WEB TRACKER

THE TRACKING SOLUTION THAT'S RIGHT FOR YOU

Web Tracker allows all U.S. shipments processed by Frontier to be monitored and easily accessed by both importers and exporters.

Web Tracker's flexibility can trace shipments that were sent by ocean, air, truck, rail and PAPS to ensure you are able to track your orders with the utmost convenience.

This system was designed with time efficient tactics in mind and the ability to pull and execute reports with the click of a button no matter where you are.

HOW IT WORKS

To log into Web Tracker, Frontier will supply you with a company code which when paired with an email and password will give you unfettered access. Predefined filters and a user-friendly layout will help you find information more efficiently.

Upon logging in, you will find an easy to navigate drop down menu that is organized into different categories. These groupings will include sub categories that make finding your target simple and time effective with the additional option to export and save records.

Web Tracker was designed for the hectic schedules of our clients. Therefore it is equipped with a "no log-in necessary" option to receive data on a particular shipment with either the shipment house bill number or the direct master number.

Company Code:	<input type="text"/>
E-mail:	<input type="text"/>
Password:	<input type="password"/>
<input type="checkbox"/> Remember me	
<input type="button" value="Login"/>	
Forgot your password?	

Shipment/House Bill/Direct Master Number:	<input type="text"/>
<input type="button" value="Find"/>	

DISCOVER THE BENEFITS

- Track shipments sent by different modes of transport, such as ocean and air in one convenient place.
- Web Tracker allows easy access to customizable reports such as invoices and shipment records.
- Predefined filters and a user-friendly layout will help you find information more efficiently.
- One location for drivers to check PAPS.
