

FRONTIER

TRADE CONSULTING

Free Trade Agreements

Our trade consultants have a wealth of knowledge to help determine which agreements your products can qualify for and will help you take advantage of preferential rates and lower duties under free-trade agreements.

Tariff Classification & Origin Determination

Every product and every variation of that product have a different number used to identify them. This number or “tariff classification” pinpoints what duties are required for your product. Our trade consulting team will help you determine your tariff classifications and the accompanying duties.

Duty Drawbacks

Many firms only recover a small percentage of duty. This can happen simply because firms don't know they are eligible to file a drawback claim. Our consultants look for every opportunity, including duty on assembled merchandise and finished goods.
